

# COMP-SCI 5551 Advanced Software Engineering Assignment 7 Solution

Sri Harsha Chennavajjala (7),

[Sc9v9@mail.umkc.edu](mailto:Sc9v9@mail.umkc.edu)

I've extended the tutorial 6 application to implement the basic CRUD operations of REST. Below are the screenshots of the application.

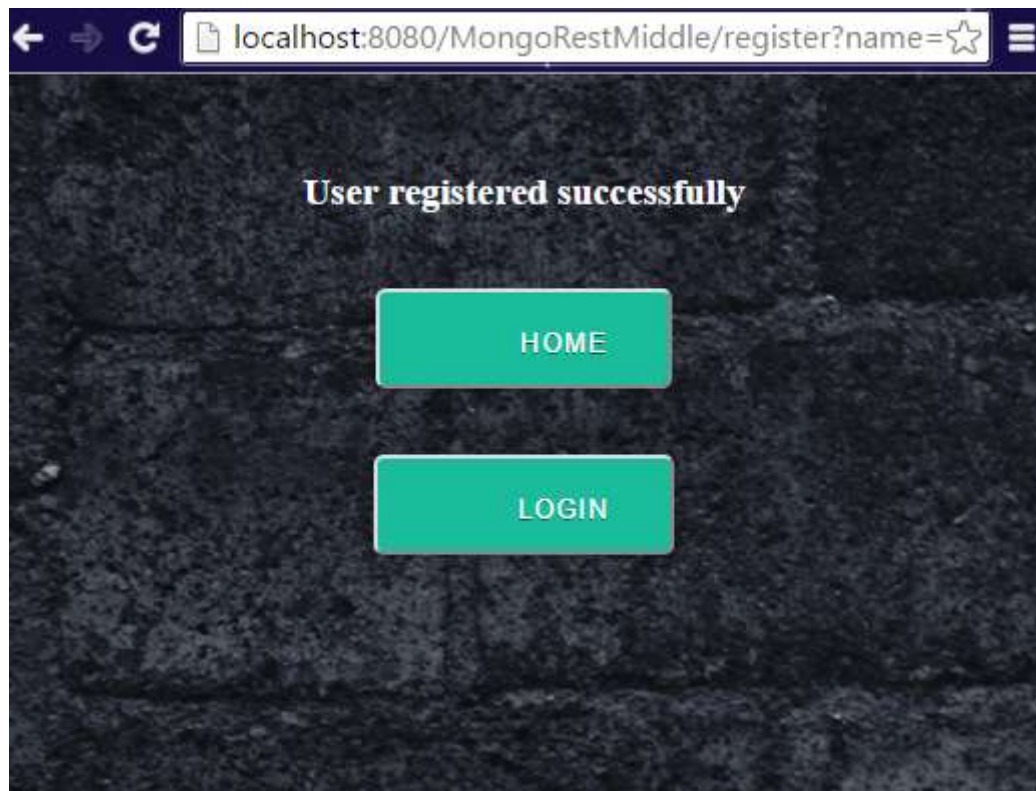

**Welcome page:**

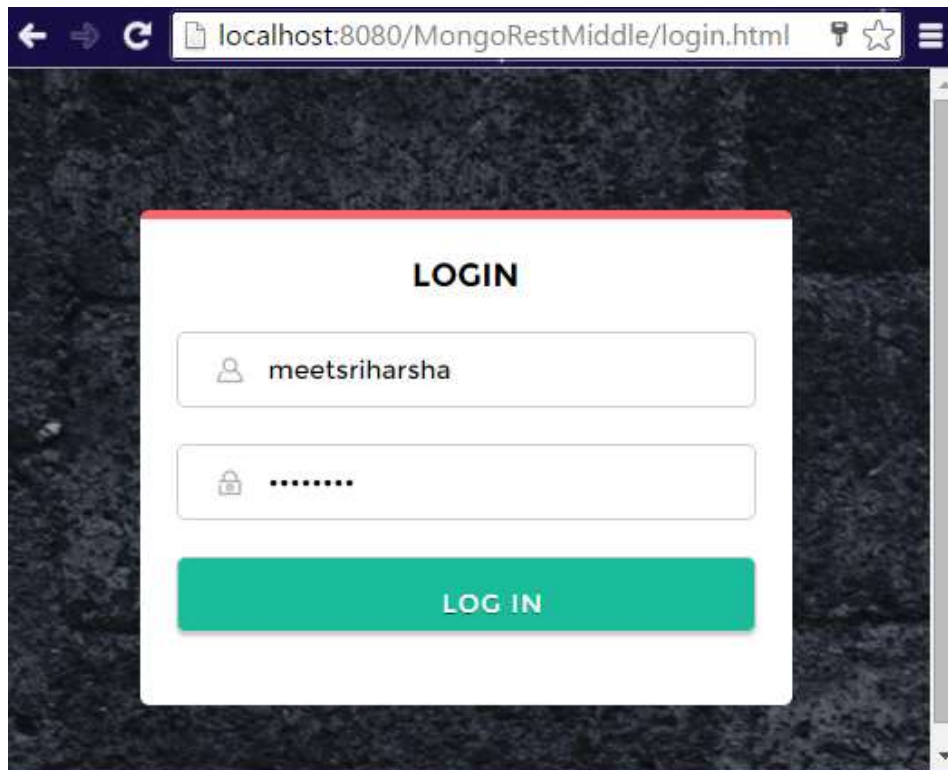

The user will select either login or signup options.

**Sign Up Page:** User will be presented with a basic form for INSERTing the details into MongoDB.

A screenshot of a web browser showing the sign-up page. The address bar shows 'localhost:8080/MongoRestMiddle/register.html'. The page has a dark, textured background. The title 'Please fill the following information' is centered in a white serif font. Below the title, there is a registration form with five teal input fields, each with a white label: 'Full Name', 'Email', 'Username', 'Password', and 'Confirm Password'. At the bottom of the form is a teal button with white text that says 'SIGN ME UP!'. The browser's address bar also shows a star icon and a menu icon.

Login page: READ Operation

← → ↻ 📄 localhost:8080/MongoRestMiddle/login.html 🔑 ☆ ☰

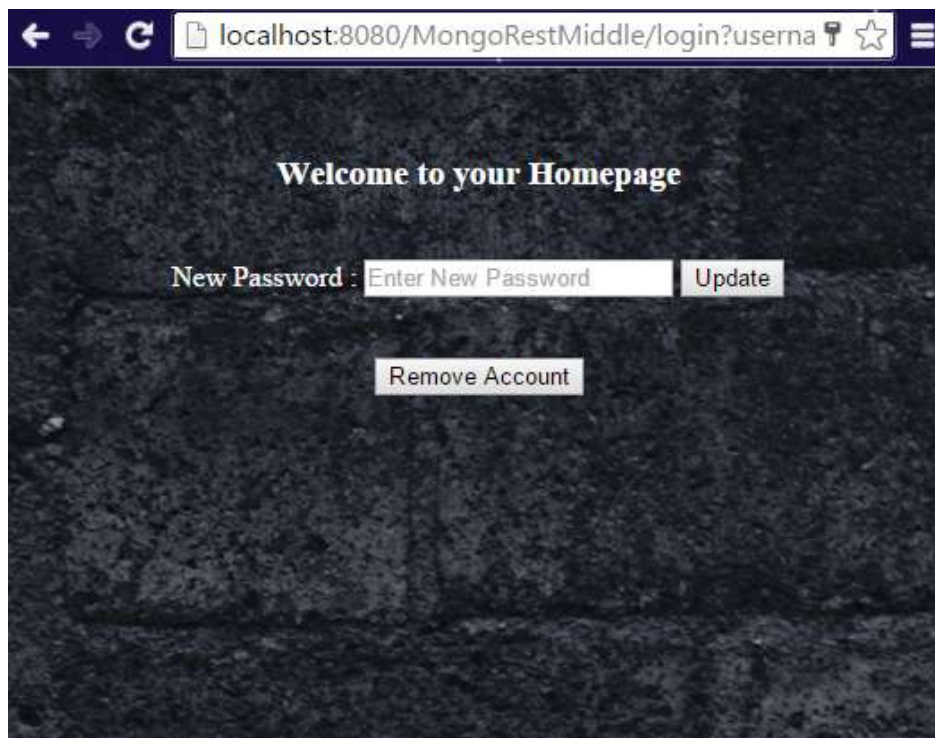

### LOGIN
